<<BODY COPY>>

Put your tape libraries in motion. Evolve with Dell™ PowerVault™ series of Ultrium® 3 LTO-3 productsⁱ, designed to add greater capacity, speed, and functionality to your data storage. Third-generation Linear Tape-Open™ (LTO) technology advances beyond the design of earlier LTO models, with accelerated reliability, performance, and automation-class benefits.

Bigger

More capacity means more savings. Ultrium LTO-3 doubles the native capacity to 400GBⁱⁱ to reduce tape quantities, backup windows, and ownership costs.

Faster

Unsurpassed performance meets the need for speed. Ultrium LTO-3 races ahead with native transfer rates to 80MB/secondⁱⁱⁱ, digital five-speed matching, and shorter load/unload cycles.

Better

Reliability and functionality extend and protect. Ultrium LTO-3 features field-tested components, firmware stability, pinpoint diagnostics, new Write Once Read Many (WORM) capabilities, and backward and forward compatibility.^{iv}

Ultrium LTO-3 drives are certified with Dell servers, and available in the PowerVault 110T, 114T, 124T, 132T, 136T, and exclusively in the new automation-class Dell PowerVault ML6000.
